Subject: Question regarding truck emissions reporting

Hi (b) (6) --As I mentioned in my April 5th email, the Coeur d'Alene Trust (Trust) 2017 contracts required that 55% of on-road trucks working on Trust projects meet EPA's 1994 on-road particulate matter emission standards. During hauling by the Trust's contractors in 2017, 75.5% of these contractors' trucks met these standards which exceeded the current 55% contract condition. The contractors aren't required to provide specific truck by truck compliance. The 2018 requirements remain the same; however, there are additional requirements added for the 2019 year.

Please let me know if you have further questions.

Sincerely,

Bonnie Arthur
Project Manager
EPA R10, Office of Environmental Cleanup
